DISCLAIMER

The primary purpose of this whitepaper is to provide potential token holders with pertinent information for them to thoroughly analyze the project and make an informed decision.

Prior to your participation in this platform we strongly advocate a careful study of this whitepaper.

PROSPECTIVE

INTRODUCTION

With technological advancements, the Blockchain and Metaverse are driving more people to go online for gaming and enjoyment. The virtual world develops and changes as a result of the decisions and activities of the society that inhabits it.

Those who believe in these new worlds own and participate in key elements of them gain huge financial rewards.

In this paper we will discuss our Prospective ecosystem value in this revolutionary world that provides unique virtual reality experience that connects people together in a stimulating environment.

PROSPECTIVE

PROSPĂCTIVE ECOSYSTEM

Prospective is a virtual 3D world that provides users with limitless options. Users can own, create, play, sell and participate in this virtual environment. Our system takes advantage of the distinction of combining the aforementioned systems to produce a vast ecosystem with limitless opportunities.

The core elements of our ecosystems are PROS TRC20 Token, PROS M-NFT, and Openverse that gives everyone access to a personalised digital future on the Tron Blockchain.

The biggest problem in finance, whether dealing in crypto or fiat, is maintaining fast and efficient transactions without increasing transaction fees. Prospective LLC's ® goal is to reduce transaction fees to $0 inside our ecosystem.

Vision

Our vision is to create value via experience, share the value through community and promote value creation that leads to prosperity.

Core Features of Prospective

PROS TRC20 TOKEN

In the PROS ecosystem, the PROS TOKEN serves as the primary unit of exchange. PROS Tokens can be acquired by community members through trade, staking, or as payment for ecosystem contributions. Staked PROS Tokens have a voting value of 1.

 — *Allowance Earnings Model*

In order to keep transaction fees to a minimum, our allowance earnings model reinvests into the ecosystem.

 — *Stable Market*

Its primary goal is to provide the best possible level of service to its customers. Additionally, it uses artificial intelligence to produce earnings automatically, allowing users' digital assets to be used to their fullest potential while also supplying a consistent income over time. By protecting our ecosystem with Pros Venture DAO, Prospective establishes a stable market for PROS as more people start to own a piece of the digital future.

PROSPECTIVE

PROS M-NFT

M-NFT was developed to solve the three main use cases of record-keeping, cooperation, and exchange. Users can alter their non-fungible assets while maintaining immutability using our model M-NFT. NFTs can take many different forms in virtual settings, including characters, products, land, decorative customization elements like digital apparel, and more. PROS M-NFT token represents a period in which digital commodities, experiences, and relationships are valued more highly than our physical surroundings.

Our PROS M-NFT assets' immutability and customization give the owner unrestricted access to enhancing their worth and potential applications. We have created a marketplace for NFT assets that still haven't been traded anywhere in the blockchain landscape.

PROSPECTIVE

OPEN VERSE

OpenVerse is a true metaverse frontier where community users will be able to create totally original experiences using currently available, industry-standard 3D apps and software development tools in contrast to most platforms that merely pretend to be open. OpenVerse creates an open and fair economy that is supported by Tron blockchain technology. In our OpenVerse, a comprehensive portfolio of user-created decentralised applications (DApps), will make creation simple even non-programmers.
 — *Decentralized Applications*

All DApps and transactions are powered by PROS. The use of (DApps) will enable beginners to make games, start virtual businesses, or run AR shopping experiences. The most recent versions of industry-standard software are connected by business and professional users to produce digital twins, AI simulations, and virtual workspaces.
